Work Experience

Isometric Technologies

Senior Software Engineer

Jan, 2023 - Present

Isometric Technologies is a neutral, third-party facilitator of the exceptions process between business entities in the logistics industry.

- Designed and implemented a public-facing API against our backend services to support an entirely new product stream, generating \$300k in ARR before launching.
- Developed a highly-performant Proximity Search feature for the main app, improving user engagement by 12%.
- Iterated upon an event-sourced service to provide visibility and empower reconciliation into our data-ingestion pipeline - generating time savings of 18% for our SA and CX teams.

Included Health

Senior Software Engineer

Oct, 2020 - Jan, 2023

Included Health is the result of a merger between Doctor on Demand, a telehealth provider, and Grand Rounds Health, a healthcare navigation service. Together, they provide a single hub for all things healthcare.

- Tech lead for the ePrescribing system that generated >\$20M in revenue.
- Innovatively hacked together a solution that optimized workflow, saving over 50% of the support team's time, significantly enhancing operational efficiency.
- Successfully led a cross-functional, time-sensitive project pivotal for onboarding a major customer, ensuring a seamless integration process and enhancing client satisfaction.

Avadine

Software Engineer I Project Manager

Aug, 2018 - Oct, 2020

Avadine is a consulting company that implements and supports web applications and control systems for local oil/agriculture companies.

- Led and mentored a team of 4 developers, expertly managing multiple projects simultaneously, showcasing strong leadership, teamwork, and excellent time management skills.
- Revolutionized a critical process by implementing parallelism and batching techniques, achieving a 10x increase in speed, demonstrating exceptional problem-solving and technical innovation.
- Designed and developed robust Java modules for interfacing with highly specialized control systems equipment, highlighting advanced technical proficiency and a keen ability to adapt to specialized technologies.
